HB 2

To Montana State Legislators

In regards to MHHS/CPS

We as a family of four were

in need of some counseling for some

problems that most Montana families

have, alcoholism. ADD child, no real

close family connections for help in raising

children. The CPS office was asked

to check into my family because

of Domestic Violence issues and

alcoholism, we, as a couple, were

asked to a family intervention, to

determine childrens safety, as well as,

parental safety. The office was

on time, courteous, they didn't judge my family because of the problem at hand. The staff asked questions concerning the problem without judgement, they allowed us to answer in our own words, allowing us to explain the problems and direct us to the correct people to receive the help we all need. In the amount of time, 2 months, we have been seeing all the counselors for the problems, they are improving our thinking errors and the family problems are also

being taken care of in the process.

We as a family appreciate the

help from this office as well as all

the other support of other agencies

in our community. We also didn't

really want CPS; involvement in our

life, but as things have turned out

it is a good thing for this family.
